Objective

Dedicated and detail-oriented software developer with over 3 years of experience in Python and Django development, seeking a challenging role where I can apply my expertise in back-end and front-end technologies to contribute to innovative projects.

Education

Bachelor of Science (BSc) in Computer Science

University of XYZ | Graduation: May 2019

Relevant Coursework:

- Data Structures and Algorithms
- Web Development
- Database Management Systems
- Cloud Computing

Certifications

- **AWS Certified Solutions Architect – Associate**
- **Google Cloud Professional Cloud Architect**

Certainly! Here's a resume tailored to the job description you provided:

Technical Skills

- **Programming Languages:** Python, JavaScript, HTML, CSS
- **Frameworks & Libraries:** Django, React, Node.js
- **Databases:** PostgreSQL, MySQL
- **Cloud Platforms:** AWS, Google Cloud Platform
- **Version Control:** Git, GitHub
- **Other Tools:** Docker, Kubernetes, Jenkins

Professional Experience

Software Developer

ABC Tech Solutions, New York, NY | June 2021 – Present

- Led the development of web applications using Django for back-end functionality, integrating RESTful APIs, and React for front-end components.
- Built and deployed cloud-native applications using AWS and Google Cloud infrastructure, significantly reducing operational costs by 20%.
- Collaborated with cross-functional teams to design scalable software solutions, contributing to the optimization of legacy systems.
- Implemented automated testing and CI/CD pipelines using Jenkins, increasing deployment efficiency by 30%.
- Mentored junior developers and facilitated code reviews to maintain high coding standards.

Junior Python Developer

XYZ Innovations, Remote | June 2019 – May 2021

- Developed and maintained Python-based web applications using Django, focusing on optimizing back-end performance.
- Worked on front-end integration using React, improving user interface responsiveness and overall experience.
- Managed database design and optimization in PostgreSQL to enhance system performance for large-scale applications.
- Supported the migration of legacy applications to cloud environments, specifically AWS and Google Cloud, improving scalability and reliability.
- Assisted in the design of RESTful APIs for mobile and web applications.

Projects

E-Commerce Platform

Developed a full-stack e-commerce platform using Django and React, handling end-to-end product management, user authentication, and payment integration via Stripe. Deployed on AWS and utilized S3 for storage and CloudFront for content delivery.

Resume Parsing Tool

Built a resume parsing tool using Python and natural language processing (NLP) techniques to analyze and extract information from PDFs, improving recruitment efficiency for hiring managers by ranking resumes based on job description alignment.

Additional Experience

- Actively contributed to open-source projects related to Django and Python development.
- Participated in hackathons and coding challenges, consistently placing in the top 10%.
